## What's New In AMP Tile Viewer?

Low-Resolution for Mobile Devices Cool Maps for Android Worth a try Description AMP Tile Viewer is a free application that can create big tiles out of small ones. The idea is very simple: the less area you're able to use, the more intriguing the thumbnails are, and the more tiles you can build up. How does this work? With the help of the app, you can add JPG photos, or create your own photos, then have them automatically inserted into the preview window. To the right of each tile, you get some text elements and a menu. These control the way tiles are arranged, zoomed in or out, saved as JPEG or BMP files, and organized into mosaic tiles. It's possible to automatically save images as tiles via the app. When saving the tiles, you need to define the dimension of the output layout, and if you want to add some text elements to the tiles. Some pre-defined templates are available from the download page. More features are coming up in the future. Interface and file support Once the program launches, you're greeted with its classic window elements, with nothing to make it stand out from the crowd. However, this simplicity helps you quickly accommodate, since you don't feel overwhelmed by too many elements. Most of the space is the preview area, with functions stored and accessed from the upper toolbar. Pictures can be loaded simply by dragging them over the main window, or through the built-in browse dialog. However, you can insert just one at a time, and you need to make sure it's under formats like JPG, GIF, TIFF, PSD, BMP, PSP, TGA, ICO, WIN, PCX, PCS, PPM, RGB, RLA, PIC, CUT, and more. Leaves more to be desired As soon as the picture loads, the preview area is covered with the same picture over and over again, thus automatically creating a tile, image. You can zoom in or out for better analysis. General details are placed in a small panel, which you either access from the context-menu or upper toolbar. If the new tile design looks appealing, it's possible to have it saved either as BMP or JPG. Unfortunately, there's no possibility to set
