In 2010, AutoCAD Full Crack was estimated to have 200,000 active users, according to Autodesk's web site. In 2018, AutoCAD Product Key had about 320,000 active users. Contents show] History AutoCAD was originally developed by Harlan and Meredith Blaies, who held U.S. patents on related technology, and shipped in December 1982 for \$995, including a hard-shell case. The software was developed using a FORTRAN IV compiler. The version 1.0 program included a menu-driven interface, only plot and drawing commands, and no editing commands.[1] AutoCAD was originally designed to complement the popular MITS Altair 8800 computer, which lacked a built-in graphics terminal, but was also compatible with Xerox 9700 and Apple II computers. The user interface in AutoCAD 1.0 was designed to look and act like a card-tray filing system with the drawing area being analogous to a card tray. Drawing commands were executed by opening a drawer and then placing the cursor in the drawer. The drawer interface was later redesigned as a menu-driven interface for higher productivity. The menu-driven version of AutoCAD 1.0 was widely distributed to universities and other educational institutions.[2] In 1983, AutoCAD version 1.1 was released. This version allowed the user to draw both plots and geometrical objects, such as arcs, lines, circles, polygons, and text. It also supported lines, arcs, and polygons. A full-featured menu-driven user interface was introduced, and the program was marketed as AutoCAD Add-in for Microcomputers, to reflect the limited machine on which it was originally intended to run. In the early 1980s, the price of adding-in software was excessive, compared with the cost of an MITS Altair 8800 computer. The cost of AutoCAD, including both the computer and the software, was about \$18,000, although this may have included a discount for using an MITS computer. By contrast, an Altair 8800 computer sold for about \$12,000, and an Apple II computer sold for \$9,000 in 1982.[3] Shortly after AutoCAD version 1.1 was released, Michael Danowsky and Lou Scianitti, formerly of G.D. Engineering, Inc. (GDE), joined Harlan and Meredith Blaies
